

# M. DILIPCHENDRA

Forward Deployed Engineer (AI Solutions & Integrations)

dilip.madagari@gmail.com | +91 7075464029 | Hyderabad, India (Remote-Ready)  
GitHub: github.com/Dilip-chendra | LinkedIn: linkedin.com/in/dilip-chendra

## OPERATING PROFILE

Forward Deployed AI Engineering student specializing in bridging the gap between advanced machine learning capabilities and real-world business requirements. Highly capable of diagnosing technical problems, scoping customer needs, and building end-to-end proofs-of-concept using Generative AI, REST APIs, and full-stack frameworks. Deeply experienced in translating ambiguous workflows into reliable, automated pipelines using LangGraph, RAG architectures, and deterministic policy firewalls. Strong technical communicator who thrives on taking ownership of software deployments from initial integration to live production.

## TECHNICAL ARSENAL

**Software Integrations:** REST APIs, Webhooks, JSON, Full-Stack Development, Third-party System Connectors.  
**AI & GenAI Tooling:** Agentic Workflows (LangGraph), Prompt Engineering, LLM APIs (Anthropic, OpenAI, Gemini), MCP.  
**Data & Backend:** Python, Node.js, TypeScript, Vector Databases (ChromaDB), RAG Pipelines, SQL.  
**DevOps & Execution:** Git, GitHub, Linux CLI, System Troubleshooting, Technical Documentation, Prototype Deployment.

## SHIPPED SOLUTIONS & AI INTEGRATIONS

**ReviveOS (Autonomous Agentic Integration Engine)** *Python, LangGraph, LLM APIs*

- Workflow Automation:** Architected a multi-agent control plane capable of routing logic and executing complex business workflows autonomously.
- API Reliability:** Engineered a Deterministic Policy Firewall utilizing strict Pydantic schema validation to safely format JSON payloads, ensuring AI agents interact flawlessly with external REST APIs and third-party tools.

**Enterprise Brain OS (Internal RAG Deployment)** *Python, ChromaDB, Document Processing*

- Customer-Centric Architecture:** Translated the operational problem of scattered institutional knowledge into a deployed hybrid-search RAG solution, allowing internal teams to query enterprise data instantly.
- System Implementation:** Built and debugged the data ingestion pipelines, iterating on vector embedding strategies to optimize search relevance and eliminate LLM hallucinations.

**AI Business Builder (Full-Stack SaaS Platform)** *TypeScript, React, Node.js, FastAPI*

- End-to-End Productization:** Developed a full-stack platform bridging intelligent AI backends with dynamic user interfaces, proving the ability to ship complete, user-facing applications and manage cross-stack integrations.

## PROFESSIONAL EXPERIENCE

**Machine Learning Intern** *FlyRank AI*  
*Jul 2026 – Sep 2026* *Remote*

- Data Pipeline Engineering:** Analyzed unstructured, ambiguous data streams and developed automated Python preprocessing workflows to unblock downstream machine learning deployments.
- Technical Troubleshooting:** Actively monitored data outputs, identified root causes of pipeline failures, and adjusted configurations to ensure continuous, reliable system operation.

**Machine Learning Intern (NLP & AI)** *Infosys Springboard*  
*Nov 2025 – Jan 2026* *Remote*

- Evaluation & Communication:** Scoped and evaluated modular Natural Language Processing prototypes, diagnosing failure points in logic flows and effectively communicating technical capabilities to stakeholders.

**Python Developer Intern** *TechSonix Solutions Pvt. Ltd.*  
*Sep 2023 – Nov 2023* *Hyderabad, Telangana*

- Backend API Integrations:** Built custom Python scripts and integrated webhooks/REST APIs to connect legacy internal operational systems, working entirely within terminal-native Git workflows.

## EDUCATION & CERTIFICATIONS

**Bachelor of Technology in Artificial Intelligence and Data Science** *Expected May 2027*  
*Nalla Malla Reddy Engineering College (NMREC)* **CGPA: 8.5 / 10**  
**Relevant Certifications:**

- *Model Context Protocol: Advanced Topics & Claude Code in Action* (Anthropic, Aug 2026)
- *LangChain Certification* (HCL GUVI, Jun 2026)
